

FLOWCHART OF PUZZLES

PUZZLE 1: HIPPA

- Receive patient chart on bed
- Scratch out all HIPPA violations revealing the answer

PUZZLE 2: VITALS

- From clue 2, students will scan QR code revealing a safe
- They listen to a heart beat and input the number into the safe code

PUZZLE 3: DRAPING

- Students will unscramble letter in clue 3 revealing the word DRAPING leading them to the bed
- Students will fill in the missing letters of the paragraph to reveal the next clue

PUZZLE 4: BODY MECHANICS

- Students will look under the box from clue 4 to reveal a word search
- Complete word search and match the word to the definition
- Once they have found the word, they highlight the letter next to the definition to reveal a phrase

PUZZLE 5: TRANSFER

- Student will match each transfer description to the picture that shows it best
- Once in the right order, the students will enter the correct sequence of numbers corresponding with the pictures to unlock a box

PUZZLE 6: BED MOBILITY

- Students will read story and cipher through sentences to reveal a message at the end
- Message states "A patient who should never push or pull will need to embrace this safety device"

PUZZLE 7: ASSISTIVE DEVICES

- Students will find puzzle 7 on the back of cardiac pillow
- They will complete alternative alphabet revealing "Can't walk, what do I use"
- Clue 8 will be found on back of a hemi-cane

PUZZLE 8: WHEELCHAIR

- Students will go to a wheelchair from the previous clue and find a crossword puzzle at the armrest
- They have to complete the crossword to fill in boxes that are highlighted in the puzzle to reveal a phrase leading to the next clue

PUZZLE 9: INFECTION CONTROL

- Students will sit in the wheelchair and look in the mirror to read clue that is written backwards

PUZZLE 10: INFECTION CONTROL

- Students will complete a mini quiz; each answer letter choice reveals a code at the end letting them know they can escape
